The Wilson Reading System (WRS) Level I Steps 1-6 Practicum is intended to prepare the participant to effectively implement a multisensory structured language (MSL) reading program with a student reading and spelling below grade level, including those individuals diagnosed with a language-based learning disability, such as dyslexia.

Each participant will acquire a sophisticated working knowledge of the sound-symbol system of English (phonology), the rules that govern spelling in the English language, and its structure (morphology), as well as the use of specific diagnostic instructional methods. Satisfying the requirements of this course includes the identification, assessment, and approval of a practicum student in grades 4-12 with significant word-level deficits.
