February 22, 2017

Dear Parents/Guardians:

As was previously announced, we have been in the process of collecting water samples from each of our buildings and submitting them to a state approved lab. This has been completed in compliance with the Department of Education regulations that all schools test their drinking water to ensure that lead levels are safe for drinking.

Following instructions given in technical guidance developed by the New Jersey Department of Environmental Protection, we identified and tested all drinking water and food preparation outlets.

We are pleased to notify you that, upon completion of this testing, the water has been assessed as safe. In fact, our levels were significantly below the lead action level established by the US Environmental Protection Agency for lead in drinking water (15 µg/l [ppb]).

At this time, the full report, complete with testing results, is available for your review on our school website ([www.banyanschool.com](http://www.banyanschool.com)), via a hyperlink from the Welcome Page, under "Take Note."

For more information on reducing lead exposure around your home and the health effects of lead, you can visit the EPA's website at [www.epa.gov/lead](http://www.epa.gov/lead), call the National Lead Information Center at 800-424-LEAD, or contact your health care provider.

As always, if you have any additional questions, please feel free to contact any of the administrators for further clarification.

Sincerely,

  
Wendy McNeill  
Principal

  
Marguerite Freeman  
Principal

  
Erik Glazner  
Assistant Principal
